

Blue Ribbon®

OSB

From structural sheathing to around-the-house projects,

Georgia-Pacific Blue Ribbon® Oriented Strand Board (OSB) fills the bill for contractors and do-it-yourselfers alike.

Blue Ribbon OSB is made of compressed wood strands arranged in three perpendicular layers and bonded with a special resin. Excellent fastener holding capacity as well as strength, stiffness and stability make it ideal for many applications, including sub-flooring and roof and wall sheathing. The distinct blue edge helps reduce moisture absorption.

Blue Ribbon OSB Rated Sheathing

Uses: *Roof sheathing, wall sheathing and sub-floors*

- Span rated for application perpendicular to rafter and wall studs.
- Requires ply-clips for maximum span ratings on roof applications.
- Appropriate for weather-protected applications only.

Note: *Space panel edges 1/8" apart.*

Blue Ribbon OSB Sturd-I-Floor®

Uses: *Sub-flooring*

- Sub-flooring and underlayment combined in a single panel suitable for direct application of carpet and pad.
- Available with square or tongue-and-groove long edges, it is APA-rated and manufactured in 4'x8' panels.
- Span rated for application perpendicular to floor joists.
19/32" 20" o.c.
23/32" 24" o.c.
- Appropriate for weather-protected applications only.

Note: *Space panel edges 1/8" apart.*

Blue Ribbon OSB Do-It-Yourself Panels

Uses: *Partitions, utility applications and home projects*

- Versatile, economical panels perfect for DIY jobs.
- Available in 1/4" panels only and not rated for span or exposure.

Mill Locations

GP produces Blue Ribbon OSB at six manufacturing facilities:

Fordyce, AR

Brookneal, VA

Grenada, MS

Skippers, VA

Hosford, FL

Mt. Hope, WV
